ANDERSON WORKS TO REFORM STATE GOVERNMENT

Senator Anderson recognizes that state government must adapt to meet the needs of a changing Michigan. As working families adjust their own budgets in difficult economic times, Michigan's government must tighten its belt and make sure it is lean, focused, and efficient.

That's why Senator Anderson:

- Voted to cut his own salary and eliminate lifetime health care benefits for legislators
- Supported measures to increase government transparency
- Is taking action to require independent top-to-bottom audits of all government departments to find and eliminate wasteful spending
- Has proposed docking legislators' pay when they don't show up for work

SUPPORT FOR MANUFACTURER INVESTMENT KEEPS JOBS IN MICHIGAN

Recently, engine manufacturer Detroit Diesel announced that it would be investing \$194 million in its Redford facility after a package of tax credits and grants offered by the state. Senator Anderson supported legislation that made this incentive package possible. The new diesel engine line is expected to retain up to 7,704 total Michigan jobs, including 1,900 directly at the company. The company had originally considered moving these jobs to Mexico or Germany.

Investments like these represent an important part of helping to reinvigorate Michigan's manufacturing economy. Senator Anderson will continue the fight to end outsourcing by working to make Michigan an attractive place for job creators to invest.

ANDERSON FIGHTS TO PROTECT CITIZENS, SMALL BUSINESS, AND MICHIGAN'S WATER

The oil spill in the Gulf of Mexico was one of the worst environmental disasters in our country's history. Recently, another oil spill happened right here in Michigan. A pipeline that runs from Indiana to Canada leaked, spilling 1,000,000 gallons of oil into the Kalamazoo River.

Michigan families rely on clean groundwater for their drinking water. Michigan's tourist industry is the third largest sector of Michigan's economy, generating \$18 billion per year, mostly for small, locally-owned businesses.

Senator Anderson knows that our abundance of clean water is a vital part of Michigan's identity and its economy and has introduced resolutions that would permanently ban oil drilling in the Great Lakes and ensure that corporate polluters are required to pay for the cost of the swift cleanup after these disasters and not leave the taxpayers on the hook.
